

**THE ONE CONCEPT**

# The Opportunity Checklist

1. **WHAT** is OneCoin?
2. **WHO** is behind it? What is their expertise or experience?
3. Is it **LEGAL**? Can I get into trouble promoting it?
4. Is it **REAL**? Is there a real world market that people outside the network are willing to pay for?
5. How do I make **MONEY**? Income vs Capital growth
6. Is it **SIMPLE**? Can I do it? Simple but fair plan
7. What is my **SHORT TERM** strategy?
8. My **MID** to **LONG TERM** strategy and **EXITS**?

# What is OneCoin?

- OneCoin is a new type of **Cryptocurrency** - a digitally created currency based on advanced mathematical algorithms
- Born out of the success of Bitcoin
- OneCoin is **not a premined currency**, the members will create the market, mine the coins, and **keep the profits!!**
- OneCoin **will** be traded on a Public Exchange
- Highly lucrative yet simple and fair compensation plan
- OneCoin can become the next successful cryptocurrency on the market

# How does the algorithm work?

The algorithm for a legitimate cryptocurrency has a **FIXED** or **FINITE** number of solutions (called coins), unlike an illegal money game in which they make as many fake coins as they want. OneCoin's algorithm can produce exactly 2.1 billion coins.

Everything is governed by the mathematics and cannot be changed once mining begins. You could even produce a cryptocurrency with just 3 coins (solutions). In this example, all three are correct solutions to the question - what makes 5? therefore it would yield precisely 3 coins as a reward

✓  $5 = 3 + 2$

✓  $5 = 4 + 1$

✓  $5 = 5 + 0$

# THE BITCOIN SUCCESS STORY

## BITCOIN PRICE DEVELOPMENT

# BUILDING MINING POOLS TO JOIN RESOURCES – MINING NOW IS ONLY FOR PROFESSIONALS

FROM

Bitcoin  
Mining 2009

TO

Bitcoin  
Mining 2014

- Technology now is so advanced and expensive – if a user does not join a Pool but mines on his own, he needs high investments and over 450 days to become profitable!
- OneCoin users build pools and mine the coins together, sharing resources and rewards!

# THE MORE DIFFICULT MINING BECOMES, THE HIGHER THE PRICE OF THE CRYPTOCURRENCY

The higher the mining difficulty, the higher the coin price!

Join early for profit!  
The more difficult mining,  
the higher the coin price!

## THE FIRST RECORDED OFFLINE BITCOIN TRANSACTION

In 2010 a man buys a Pizza for 10,000 Bitcoins.

Today this is worth around USD \$7 million.

This is the most expensive Pizza in the world!!!

The 7 Million USD Pizza!

# WHY ONECOIN IS BETTER THAN BITCOIN

1. More advanced and more secure algorithm (SCRIPT)
2. Smaller denomination makes coin more usable (2.1 Bn coins) – Bitcoin reached up to 1200 USD per coin, which made it inaccessible for many people and not practical as a currency
3. OneExchange provides due to its centralization higher liquidity and less volatility, unlike multiple Bitcoin exchanges all selling at different rates
4. Dedicated management team responsible for strategy, attracting merchants and building the OneCoin brand vs decentralized approach of Bitcoin
5. OneCoin is mined in mining pools (or teams), keeping individual investment in hardware etc. minimal
6. OneCoin uses KYC procedure and cannot be abused for illegal purposes like Bitcoin was (Bitcoin was used for buying drugs and weapons on the internet)
7. OneCoin is still in an early stage and therefore interesting for investors, while Bitcoin is already very mature – and the opportunity is over

## LEGAL OPINION ONECOIN

We have been asked to assess the legality of cryptocurrency by our client, OneCoin Ltd.

A cryptocurrency is a digital commodity created according to strict mathematical principles by a complex algorithm, thereby generating a finite supply. Unlike normal currencies, which are printed by central banks, cryptocurrencies are inflation-proof and respond to supply and demand like any other commodity.

As a result, most countries have recognized cryptocurrencies as a bona fide commodity, which may be held and traded by their citizens.

In our opinion the 'OneCoin' is a legitimate product, limited to 2.1 Billion.

# START-UP BONUS

The more popular OneCoin is – the higher the value of the cryptocurrency. To maintain the positive momentum and excitement of our members – during the **first 30 days** after you join us you will receive additional **10% of all direct sales** you generate during this period! So keep on sponsoring people, because the clock is ticking.

The only condition is, that you generate a BV that is higher than 5.500.

The bonus will be paid out to your mandatory account.

# ACCOUNT DOUBLING OR SPLITS

As more and more members join, and the demand for tokens gets higher and higher it is only natural that the price of the tokens increases. With every new member joining One, the demand grows and the **price of our OneTokens on the exchange grows.**

Of course we want OneCoin to be successful – but a price explosion too early is not always good. **This is why we created the opportunity for you to split and double your money!** New members can join at attractive low prices – but we do not want you to have a disadvantage. This is why once a number of new members is reached – we **SPLIT** your Tokens. This means we double the amount on your account!

And as more and more new members join – the price again rises – again a **SPLIT** happens. Congratulations, you **AGAIN** doubled your money. Depending on the package you have you **SPLIT** up to 2 times – you can do 2 split and achieve the **value of your product package!!! So accumulate and save these Tokens... or buy more.**
